01 Problem

For the approximately 90% population of over 1 billion people living with mental health conditions globally, experiencing barriers of accessibility and timely intervention to their mental health challenges, the repeated problem is the existence of barriers to accessible and timely intervention to mental health challenges because of severe structural shortage, reactive mental health systems, poor timing, inadequate data availability, leading to several physical health challenges and over 700,000 lives lost to suicide each year.

02 Solution

FriendnPal is building a proactive intervention to mental health challenges by providing a 24/7 multimodal approach combining AI-companionship, self-guided tools and access to predictive and preventive intervention in one everyday platform with support across 32 languages through web, mobile, voice and whatsapp for professionals between the ages of 18 - 35, juggling multiple roles with exposure to stressors to achieve timely intervention at the right time before it becomes an emergency or escalates to a crisis.

06 Key Metrics

Key Metric 1: ARPU per Month - TOTAL REVENUE/NUMBER OF ACTIVE USERS - Target: Average revenue per month not less than 5000
Key Metric 2: CAC - AQUISITION SPEND/ NEW USERS ACQUIRED - Target: CAC under 450

03 UVP

We help provide a proactive approach to mental health and we do that by identifying risks, through continuous behavioral analysis and timely intervention to mental health challenges better by leveraging our AI-powered system designed to identify early signs of mental health risk and connect users to human support before escalation occurs, unlike the old model of "symptoms - crisis - diagnosis- treatment".

04 Unfair Advantage

A competitor starting today would need access to realtime data more proactiveness rather than reactiveness because prediction, prevention, and proactive intervention employing a multi-modal framework combining AI with human therapy.

07 Channels

Primary channel: B2C, Social media, symptom logs. Trust tactic: Targeted ads and thought leadership. CAC assumption: 450.

05 Customer Segments
